HYDROMAT

Features

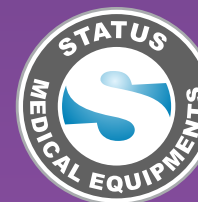

- An Ideal aid to uretorenoscopy
- As the liquid doesn't come in the contact with any part of the pump, 100% sterilization is achieved.
- Continuously variable flow from 30ml/min to 1000ml/min
- Provision for safety intro-organ pressure setting for safe uncomplicated procedure. Pressure range from 0.1bar to 0.9bar.

The system consists of:

- 1 Hydromat Control Unit
- 2 Silicon rubber tubing with 'T' connection
 - Length : 1.5mtr
 - Size : 9mm X 6mm
- 3 Power supply cable

Technical specifications:

Dimensions : 400mm X 180mm X 300mm
Flow rate : Continuously adjustable upto 1000ml / min.
Pressure : Output pressure is continuously adjustable upto 0.9bar
Power supply : 230 volts AC 50 Hz
