

# Auto-Tersus: Wireless Self-cleaning uroflowmeter

1. 'US and India Patented Self-cleaning technology with an option of having a self-cleaning Uroflowmetry chair or Male Urinal'
2. Auto-flushing after every test avoids the unhygienic task of cleaning beaker by hand
3. Smart IoT based Uroflowmeter
4. Multiplatform Application for conducting Urine Flowmetry
5. Conduct uroflowmetry test from any smart device having the application installed.
6. Access Patients database & their respective uroflowmetry test data from anywhere, at any time, from any smart device connected to the internet
7. Sampling rate, Reporting parameters and accuracy of the readings as per the ICS (International Continence Society) guidelines.
8. Coloured report format with customizable Header, which includes all the necessary patient details & Report Format as per ICS recommendation.
9. Max Flow & Average Flow Siroky Nomograms
10. Facility to immediately start the test in case of urgency
11. Record the micturition readiness of the patient by push of a button for Hesitancy Calculation
12. Offline data saving feature available in case of sudden connection loss.

## Auto-Tersus Application Features:

- Allow authorized users to log in
- Add/Edit Patient details
- Real time Uroflowmetry test
- Share the report PDF with the patient directly from your smart device.
- Calibrate the Auto-Tersus control unit & Sensor
- Perform Device health check-up
- User rights management

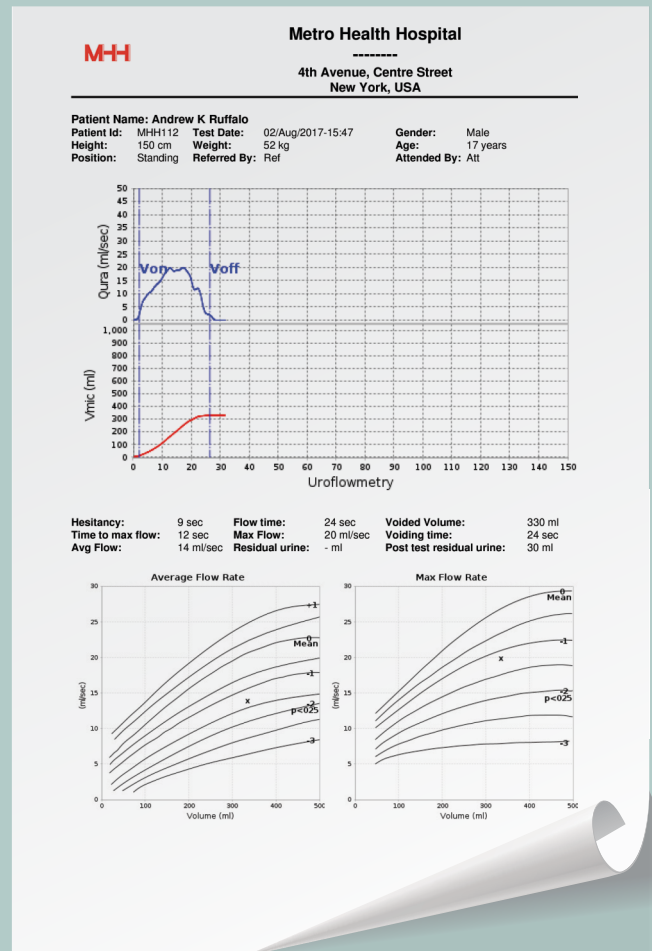

## Technical Specifications:

### Auto-Tersus Control Unit

Power Supply:	85-264VAC, 50/60Hz
Dimensions:	127x184x50 mm (LxWxH)
Weight:	520 gms

### Vmic Sensor

Dimensions:	150x40mm (Dia x H)
Weight:	750 gms

### CALCULICLAST

ASTRA 30 - HO:YAG LASER Lithotripter

### URODYNAMICS

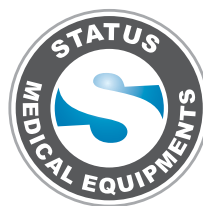

### UROFLOWMETER

### WORK STATION

### HYDROMAT

### WIRELESS UROFLOWMETER

### SELF-CLEANING UROFLOWMETRY
